

#### DESIGN IN COLOUR

**A playful scheme at Cohaus creates personality and a sense of home in a block of 20 apartments.**

Architects Thom Gill and Helle Westergaard allowed plenty of personalisation at Cohaus, including at the front doors, where they offered a choice of warm, smoky colours that makes each home feel distinct.

There's the sea-blue of Resene Navigate and the greyish tones of Resene Powder Blue. Greens include Resene Crisp Green and the greyer Resene Smoky Green. There's also the citrus of Resene Ipanema and Resene Weathered Yellow. Dark Resene Red Oxide is rich and warm, as is the amber gold of Resene Meteor. They're intermediate colours, sometimes one thing and sometimes another – a subtle approach that makes for a harmonious whole.
