

Swimming pool halls, where chlorine is used, are tough on any paint surface. For the interior and exterior paint finishes of the Baywave Tect Aquatic and Leisure Centre, the architects consulted with paint specialist Resene.

Three colours were picked to bring vibrancy to the building and identify the centre as being situated on the coast in Tauranga, says Jasmex project architect Chris Jack.

"Nearby Mt Maunganui and its Pacific coastline provided an inspiring, natural palette of colour and texture for the building accents," he says. "A theme of Paua/Pacific and pohutukawa formed

the basis for the colour selection."

Resene Padua and Resene Azure reflect the centre's water theme, he says, while Resene Monza and Resene Flashpoint capture the intensity of blooming pohutukawa flowers and highlight the facades.

"The predominant background wall colours are a combination of greys and whites from Resene The Range Whites & Neutral that are warm and neutral and complement the building materials."

For more details, contact Resene, phone 0800 737 363. Email: advice@resene.co.nz, website: www.resene.co.nz.

Above: Colours from the Resene Total Colour System, such as Resene Flashpoint and Resene Azure, put vibrancy into the Baywave Tect Aquatic and Leisure Centre. Resene Half Napa and Resene Double Sea Fog, and other shades of greys and whites used on the walls, also bring a neutral warmth to the centre and complement the base materials.
