

## How to measure

### Step 1

Measure the width of your curtain track – write this measurement into the 'track width' section on the order form.

If you are measuring for a new track, we recommend that you add 20cm to both sides of the window measurement to allow for the curtains to be stacked back - leaving the window clear, when curtains are opened.

### Step 2

To measure for the curtain drop, measure from the top of the track to the point where the curtains will end. Write this measurement into the 'curtain length' section on the order form.
