

On the wind-swept slopes of Mt. Ruapehu

RESENE DEFIES NATURE!

Defying the most extreme weather conditions right on the Top of the Bruce—Mt. Ruapehu—stands the newly constructed Ski Resort . . . beautifully finished both in and outside in RESENE P.V.A. LATEX paints. No greater compliment could have been paid to RESENE because it clearly demonstrates the confidence of the tradesman in RESENE'S unsurpassed durability and sealing qualities, as well as his preference for RESENE'S beautifying finish. RESENE defies nature under the worst conditions!

RESENE LATEX PAINT — in spite of its amazing toughness, durability and beauty — is the most inexpensive paint on the market. Widely used by professional as well as do-it-yourself painters, it is easy to apply — dries within the hour and produces a perfect finish leaving no brush marks. Thinning as well as brush cleaning is done with water — brushes last longer too! Available in Interior Satin and clear finishes as well as Exterior Semi-gloss which has proved its amazing qualities on concrete buildings, asbestos cement board and brick.
