Inject a little colour into your life with our guide to all the hottest interior trends in paint and homewares for summer

rose tinted glasses

Add a modern touch of romance and a sense of serenity to your home with soft, feminine and earthy pink Resene colours. Use a flat finish, like Resene SpaceCote Flat, for a diffused dusky backdrop and add cosy, textured Resene wallpapers with floral accents to create a warm and restful retreat.

Starting with a warm pink base, layer soft furnishings and homewares in brighter

shades of candy pink and coral to add depth and vibrancy. Or ground your poppy tones with wood stained in Resene Colorwood, burnished leather and cane for a more earthy aesthetic.

No longer strictly for Barbie, these shades of pink are sophisticated, cosy and modern. Delicious tones of sherbet and marshmallow never looked so good!

3. Fazeek Vice Versa Carafe
4. Resene Wallpaper Collection 38718-2
5. Resene Wallpaper Collection 37860-2

TOP TIP

• Don't be afraid to combine different shades of white and cream, it creates visual interest through subtle contrast while amplifying natural light. The Resene whites and neutrals collection has up to six strength variations of the most popular whites and creams to make it easy for you to mix and match.

• When pairing white and cream tones, opt for warm whites rather than cool whites. Creams add a soft glow to a room when teamed with warm whites but can look murky against cool whites.

Pale and interesting is also peaceful and uplifting when you layer milky whites with cream and caramel tones.

Try continuing your Resene wall colour onto the ceiling or floor for a more cocooning effect. Luxurious tonal looks can be created by layering one colour family. Evolve this by mixing and matching Resene colours that have similar undertones for added depth. Pair Resene Tea walls with a Resene Blanc floor, upcycle your existing furniture by repainting

it in your new colour scheme with Resene Bison Hide, or try painting vases and planters in Resene Tapa for a richer look. Layer in timber beachwashed with Resene Colorwood.

For a gentle touch of visual relief, vary your paint's sheen level for each surface, with Resene SpaceCote Flat on ceilings, Resene SpaceCote Low Sheen on walls, Resene Lustacryl semi-gloss in trims and Resene Walk-on satin finish for flooring.

TOP TIP

Recreate the look of rust on decorative pieces with Resene FX Faux Rust Effect to add warmth to your space.

down to earth

Find domestic harmony by embracing a home influenced by relaxing earth tones. Balance comfort and design by mixing artisanal handmade pieces with warm textures and touches of nature - the mix of textured organic surfaces will ground and soothe a busy home.

The earthy vibe is a natural progression from the stark white home trends favoured for many years, and you will find your space warmer and more inviting with the introduction of luxurious earthy Resene shades. Taupes, browns and ambers offer an excellent opportunity for even colour-shy homeowners to jump on board with the earthy trend and are guaranteed to work with existing neutral colours.

Seek out classic natural materials like cane, rattan and rough-hewn wooden objects and enhance their colour with Resene Colorwood wood stain to bring this look to life.
