Thank you for downloading the Resene Colour range files for ArchiCAD.

These allow you to quickly and easily use Resene's vast colour range in your ArchiCAD projects. You can quickly test different colour schemes & provide your clients with more realistic visualisations.

These colour files require ArchiCAD 9 or higher and work on both Macs & PCs.

All of the colours have been made into ArchiCAD materials and have also been optimized for use with the Lightworks rendering engine.

Adding Resene colours to your project or template files is an easy process:

1. Opening the Attribute Manager within the your project and selected the materials tab.

The Resene colours you selected have now been added to your ArchiCAD project's materials menu and can now easily be applied to walls, slabs, roofs, objects etc. throughout your project.

You can add more colours at anytime, by simply going back to your Attribute manager.
