1 Drill drainage holes in the base of the wooden box, as shown.

2 Apply one coat of Resene Quick Dry to the inside and outside of the entire box and allow two hours to dry.

3 Apply one coat of Resene Terracotta Sealer to the pots and allow to dry

4 Glue the pots to the base of the box, as shown, to form feet. Allow the glue to dry.

5 Apply one coat of Resene Sandtex to the outside of the feet and box, dabbing the paint on to create a textured surface. Allow to dry.

6 Paint the feet with two coats of Resene Limerick. As with other paint in this project, allow two hours for each coat to dry.

7 Paint the inside of the box with two coats of Resene Limerick, again allowing two hours for each coat to dry.

8 Paint the top half of the outside with two coats of Resene Limerick, and the bottom half with two coats of Resene Wild thing, making a curved upper line. When all paint is thoroughly dry, fill the box with bulb potting mix and plant your bulbs.
