

The trends have come around to perennial favourites – deep blue, red, the striking tone of black and near black, the soothing restfulness of duck egg blue and greyed blues and the bold pops of orange and yellow to add a touch of upbeat liveliness. So don't do we see so many of the perennial favourites wrapped into one trends collection; fashion favourites in a fandek.

Remember your childhood... that playful streak, your willingness to embrace the new and the joy and wonder in the smallest of things? Embrace your inner child (it's still in there somewhere!) and be spontaneous, add that bold happy colour you've always loved for a touch of fun. Sure it might not last 10 years but the enjoyment you'll get out of it in even a short period will far outweigh feeling trapped by safe choices. Colours should inspire you, help you feel at home and reflect who you are.

There is a sense of rejuvenation and reintroducing happy memories of the past to the present, bringing the favourites from our childhood into the lives of our own family.

Dusty and smoky, there is a new palette of colours coming through that feel timeless, gently weathered and softened over the passage of time. Easy to live with and coordinate, they're a sophisticated alternative to cleaner pastels. They bring with them a sense of being more grounded and less airy than the pastels of recent years.

Reds are strong and powerful, with influencing blue tones. Grey has hidden depths; sometimes blue, sometimes green. Once the complement, it's now a feature. Browns are turning more yellow toned, making them more complementary with wood.

Neutrals as always are the balance. The backdrop to the brights, your favourite accessories, the respite from busy life and the soft cocoon you can use as a launch pad as you progress down the path to bold choices. Use colour blocking and stenciling to combine favourite colours and really show off a space. Transform your walls into the artwork.

Where once there were rules, guidelines and boundaries, now there is free will, free choice and endless possibilities. The only limit is your imagination. Choose what you want, where you want and change when and if you want to. Pick and choose from the trends, but interpret them to suit you. There is no greater seal of approval for a colour scheme than your own. If you like it, then it's right.

So throw off the shackles and dive in; a world of colour is waiting for you.

Happy decorating!
