

○ Resene Spring Rain

○ Resene Half Sauvignon

○ Resene Cosmos

○ Resene Ottoman

STYLIST'S NOTES

● To maximise hanging space add a second rail at a lower level. For safety, we recommend attaching the rack to the wall.

Hang it high

Photography by Reuben Looi

Short of bedroom storage? Stylist Melissa Marriott turns a tired old ladder into a stylish clothes rack and paints it in soft Resene pinks to give it an up-to-the-minute feel.

Steps

What you need

- An old ladder or two small ladders
- Timber for the shelf – we used three pieces of scrap timber plank, each about 1.2m in length
- 32mm dowel, at least 1.3m long
- 2 x 32mm pipe clips
- Resene dropcloth
- Saw
- Resene sandpaper
- Resene MacGyver all-purpose paintbrush
- Resene Quick Dry waterborne primer undercoat
- Resene SpaceCote Low Sheen waterborne enamel in your chosen colours (we used Resene Half Sauvignon and Resene Cosmos)
- Drill, screws and screwdriver

Method

- 1 Protect the floor with a Resene dropcloth.
- 2 Use a saw to cut the wooden ladder in half; skip this step if you have two ladders. (A)
- 3 Use a saw to cut wood planks to 1.2m (or longer if desired).
- 4 Use a saw to cut the dowel to 1.3m (or longer if desired). (B)
- 5 Sand all pieces and pipe clips. (C-D)
- 6 Prime all pieces with Resene Quick Dry waterborne primer undercoat. (E-F)
- 7 Paint all pieces in Resene SpaceCote Low Sheen waterborne enamel in your chosen Resene colours. (G-I)
- 8 Drill pilot holes, then use the screwdriver to screw the shelves to the lower ladder rungs. (J-K)
- 9 Position one pipe clip in the centre of the top rung on each ladder, drill pilot holes and screw into place. (L)
- 10 Slide poles through the pipe clips, ensuring the pipe clips fit the dowel snugly.
