Resene Roof Paint Systems

Before you choose a Resene roof paint system, check the condition of your roof. For example, is it new, weathered or rusty? Details like these will help you get the right advice when you visit your local Resene ColorShop or Reseller, and a better result when you come to paint.

Resene Hi-Glo Acrylic House & Roof Paint is made with UV resistant pigments and tough acrylic polymers to give a long-life high gloss finish on new primed roofs or previously painted roofs. An Environmental Choice approved product, Resene Hi-Glo dries fast to form a flexible, weatherproof surface. See Data Sheet D31.

Resene Mica Bond Alkyd Finish provides extra protection in exposed salt-laden environments with a plate-protection shield (similar to overlapping fish scales) that seals out weather and resists UV light, drying to a durable low-lustre finish. See Data Sheet RA71.

- **1. Resene Galvo One** Galvanised Iron Primer is fast-drying, anti-corrosive and will weld itself to new or old (even lightly rusted) galvanised iron, providing an ideal surface for topcoating. Resene Galvo One is also recommended for use over aluminium. Overcoat within three months of application. See Data Sheet D41.
- 2. Resene Galvo-Prime Waterbased Galvanised Iron Primer is ideal for use on new galvanised iron or Zincalume. If the substrate is weathered, use only Resene Galvo One. See Data Sheet D402.
- **3. Resene Rust-Arrest** Anti-Corrosive Primer has been designed specifically for red rust problems. See Data Sheet RA30.
- **4. Resene Vinyl Etch** Metal Primer is ideal for professional application to galvanised iron, aluminium roofs and sidings and all non-ferrous surfaces. See Data Sheet RA31.

Resene Roof Wash and Paint Cleaner is a concentrated pretreatment for all new and old unpainted galvanised roofing, and a general cleaner for previously painted surfaces including roofing. See Data Sheet D88.

Use Resene Membrane Roofing Primer for all sheet rubber roofing systems and for unsurpassed adhesion on bituminous surfaces. See Data Sheet D49.

Roof: Resene Blue Whale

Paint and Tank Water

Recommended systems for domestic water collection off roofs are Resene Galvo One or Galvo-Prime with either Resene Hi-Glo or Resene Mica Bond. Disconnect all downpipes before applying Resene roof paint. Reconnect downpipes after the first heavy showers have flushed away stabilising surfactants from the new paint film.

How Much Roof Paint?

A good rule-of-thumb guide for calculating quantities is: your house's floor area plus about 40% (allows for roof pitch, corrugations, soffit overhang, etc). Trough section roofing can require significantly more. Typically a complete roof paint system requires surface preparation using Resene Roof Wash and Paint Cleaner, one coat of primer and two coats of topcoat at the recommended coverage rate specified on the product packaging.

Colour Ranges

The colours on this chart have been chosen for the durability and colour-fastness of their pigments. You can also choose from many other colours found on other Resene colour charts.

Colorsteel® Colours

Resene roof paints are available in all Colorsteel® colours for trims, flashings, gutterings and repaints. For heavy duty applications, Resene can supply a full range of specialist coatings. For further information call your local Resene ColorShop or Reseller.

Added Protection

In common with all surface coatings, the colour of your paint finish may be affected by UV light. Resene uses the finest pigments commercially available, but even these are liable to change after constant exposure to sunlight. Any changes will be gradual, but after a few years the difference between shaded and exposed areas may become noticeable. Resene Sun Defier UV Protective Glaze can be used as a finish coat over freshly painted bright organic hues and shades to protect these more vulnerable pigments against fading.

Complement with a stained finish

For a natural look, try Resene Waterborne Woodsman. Resene Waterborne Woodsman is a transparent wood finish that allows you to colour your timber while still allowing the natural grain to show through. Suitable for all exterior wood surfaces, including fences, decks, gates and outdoor furniture, see the Resene Woodsman chart to view the full range. Or rejuvenate or enhance your timber deck with Resene Kwila Decking Stain, the ideal way to protect your deck and achieve a popular kwila brown finish.

Walk this way

Giving your paths and steps a fresh coat of paint can do wonders for the overall look of your entranceway. Simply wash down the existing coating, remove any loose flaking material and recoat using two coats of Resene Sidewalk. Or for a more natural look, add colour to cementitious surfaces with Resene Concrete Stain, which is designed to penetrate the surface of concrete and masonry to form a tough low sheen finish that enhances the natural texture of the concrete. See the Pavings Coatings colour chart for a full range of paving paints and stains.

Splash out

After a hard day's work, relaxing in a swimming pool is always popular. Resene Swimming Pool Paint has been specially designed for direct application to concrete swimming pools. A pool coated in Resene Swimming Pool Paint 'Magic Blue' will be less affected by chemicals used for treating pools than traditional pigmented pool finishes. The result is a longer lasting colour, giving you more time to enjoy your pool because you'll spend less time repainting it.

Pots of colour

Textured, colourwashed, painted or stained... Resene has a wide range of products suitable for decorating planters. Available in hundreds of colours, Resene testpots allow you to add colour to your garden planters without being left with litres of excess paint. Testpots are available online or from your local Resene ColorShop or Reseller.

Caring for your paint finish

Annual washing will help maintain the fresh appearance of your paintwork. Follow the recommendations in the Resene Caring for your Paint Finish brochure or on the Resene website to keep your paint finish looking its best.

Put your colour to the test

No matter how you select your colours, always use testpots to confirm your choices in the area you are planning to paint. Resene testpots are available from your local Resene ColorShop or Reseller or you can order online from the Resene website.

'See' the finish

Virtual painting with Resene EzyPaint allows you to visualise the entire colour scheme before the redecorating even starts. Resene EzyPaint can be downloaded free from the Resene website www.resene.co.nz (NZ), www.resene.com.au (AUST) or purchased on CD Rom from your local Resene ColorShop or Reseller.

Explore a colour library

View an extensive range of Resene colour swatches in the online Resene colour library, then download the ones you like. Once you have found your favourites, order testpots online and try them out for yourself in the real world. Or browse through the in-store libraries of colour that can be found at most Resene ColorShops. With over 1000 variously coloured A4 swatches to pore over, you're bound to find one that suits.

Choose to help the environment

You can minimise the effect your next decorating project has on the environment by choosing one of the Resene range of Environmental Choice approved products.

TONE	KEY:	
200	7 THE R. P.	17/2

AL	=	Aluminium	D	=	Deep	G	=	Green	L	=	Light
ME	=	Metallic	MI	=	Mid Grey	MG	=	Magenta	0	=	Ochre
P	=	Pastel	RO	-	Red Oxide	U	=	Ultra Deep	W	=	White

Note 1: The approximate reflectance value (RV) of a colour indicates the amount of light and heat that a colour will reflect. Black has a reflectance value of 0% and absorbs all light and heat. The surfaces are consequently very dark and can get very hot. In contrast, white has a reflectance value of 100% and keeps a building light and cool. All colours fit within these two extremes.

Note 2: Tones listed above are subject to change if colours are reformulated.
